	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Add a reading by prompting for pH, ammonia, nitrite, nitrate and temperature ● Validate input so bad values never reach the file ● Save each reading with a date to readings.csv ● Warn when a reading is outside the safe range ● View recent readings as a table	**Schedule - (For V2.0+)** ● Trend graphs showing how each parameter changes over time ● Water change reminders based on nitrate levels and the last change ● Fish stocking and compatibility checker ● Support for saltwater and custom safe ranges ● Multiple tanks
Not Important	**Delegate - (Use a library)** ● Table formatting: use column ● Date and time stamps: use date ● Decimal comparisons: use awk ● Scheduled reminders: use cron instead of my own timer	**Delete - (Cut it)** ● Web or mobile app ● Raspberry Pi sensor automation ● User accounts and cloud sync ● AI fish-disease diagnosis from photos
